

Documentation for the Health ABC Year 17 quarterly telephone interview data is identical to the Year 15 documentation with two exceptions:

1. Where “Year 15” appears in the documentation, “Year 17” should be substituted.
2. Substitute the prefix “Y15Qq_” in variable names with the prefix “Y17Qq_,” where q equals 1, 2, 3 or 4 depending on the quarter of the year.

Again, please refer to the Year 15 documentation for Year 17.

PLEASE NOTE: the controlled oral word association data (COWAT), page 16 of the participant interview, were NOT collected for year 17 quarters 1 and 3. Also, the telephone interview for cognitive status data (TICS), pages 13, 14 and 15 of the participant interview, were not collected for year 17 quarter 2.
